SUMMARY

I am a passionate junior Web Developer who is making the internet a more beautiful and positive place (one web application at a time). My background as a financial trader allows me to be able to work under pressure and meet deadlines. My move from Bulgaria to the U.S.A. was a huge change in perspective, but this experience allows me to view a challenge or problem from multiple points of view! I excel at coming up with solutions – no matter what gets thrown at me – and I am always excited for new challenges.

PROJECTS

Hangman
I decided to create a classic hangman game with a Flower twist. In this game, the player must guess a word within the Flower-variety with 5 tries. Technologies used: HTML, CSS, JavaScript.

unifinder
This project was build to help graduates to follow their dreams looking for university around the world! The user can search universities around the world by name and country, also is able to create an account and save the searches, add, update, or delete notes. Technologies used: Express, Fetch, PSQL, EJS, Authentication, Bcrypt, Javascript, CSS, HTML.

Catherine Federer Real Estate
This project was built for Catherine Federer Real Estate which is located in Astoria, NY. The user is able to sign in and search through a variety of apartments and sent a request to the broker. Technologies used: Rails, Heroku, Active Record, PSQL, Bcrypt, Ruby, Bootstrap, CSS, HTML.
